7020401493 ◇ tejaskhile07@gmail.com ◇ [Github](#) ◇ [Portfolio](#)

SUMMARY

A software developer, adaptable to both solo and group settings while maintaining focus on meeting deadlines and delivering high-quality results. Skilled in building responsive and user-friendly websites and web applications. Eager to contribute to real-world projects and learn from experienced teams.

EDUCATION

Government College of Engineering Aurangabad, Chh. Sambhajinagar 2022-2026
Bachelor of Technology in Computer Science and Engineering

Residential Jr College, Ahilyanagar 2020-2022
Higher Secondary Education

Dnyansampada English Medium School, Ahilyanagar 2016-2020
Secondary School Education

SKILLS

Languages: C++, JavaScript

Frontend: React, Next, Tailwind CSS

App: React Native, Expo

Platforms: GitHub

Backend: ExpressJs, NodeJs

Database: MongoDB, SQL

Tools: Git, Postman

PROJECTS

CodeDock *ReactJS, ExpressJS, Tailwind CSS*

- Developed a robust real-time collaborative code editor leveraging the MERN stack and Socket.IO, enabling multiple users to simultaneously edit files with synchronized state across clients
- Implemented file management, live chat, and other features for seamless team collaboration.
- Architected a scalable server-side infrastructure with sophisticated session management, ensuring low-latency performance, smooth synchronization, and reliable user experience for concurrent collaboration. ([View Live](#))

Jobitis *React Native, Expo*

- Built a cross-platform Job Portal mobile app using React Native (Expo) with dynamic job search powered by RapidAPI.
- Implemented real-time job fetching, search, and filtering, along with seamless navigation using Expo Router for an optimized user experience.
- Integrated APIs with state management, error handling, and reusable UI components. ([View Code](#))

NextGen *NextJS, AuthJS, Tailwind CSS*

- Developed a full-stack web application using Next for SSR and optimized performance, delivering a responsive and fast user experience
- Integrated Auth.js (formerly NextAuth.js) to implement secure authentication and authorization with support for Github provider
- Used API Routes in Next.js to build a scalable and modular backend architecture within the same codebase. ([View Live](#))

CodePen Clone *ReactJS*

- Developed a fully functional CodePen Clone using React and CodeMirror, allowing users to write, edit, and preview HTML, CSS, and JavaScript code in real-time
- Designed a responsive and minimal UI, enabling smooth code editing and project management experience. ([View Live](#))
